DETAILED ACTION

1. Note claims 1-12, and 17-23 have been canceled. Claims 13-16, and 24-27 are pending in the present application.

Double Patenting

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claims 24-27 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 24-27 of copending Application No. 10/617,625, Publication No US 2004/0105586. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

Allowable Subject Matter

4. Claims 13-16 are allowed.
5. The following is an examiner's statement of reasons for allowance: The cited prior art does not particularly disclose a method for assigning quantization parameters to the groups of blocks of a picture comprising the steps of: i. setting the quantization parameters of all groups of

Art Unit: 2621

blocks of the picture equal to the largest value allowed by the video coding standard; ii. scanning said groups of blocks according to a certain scanning order, where the last group of blocks in the scanning order is followed by the first group of blocks; iii. determining whether to code the next group of blocks in the said scanning order with the quantization parameter for the group of blocks; iv. decrementing the quantization parameter of said group of blocks; v. repeating steps (b)-(d) until the sum of the estimates for the number of coding bits of all of said groups of blocks exceeds the targeted number of coding bits, $B_{sup,TR}$, for the picture as specified in claim 13, see figure 4 of the present application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
